

SafeGem

We know our Moon.

LitePaper

Safe Community Token

SafeGem - Explained

SafeGem is the ultimate GEM we were all searching for in this year's bull-run.

THE SEARCH IS NOW OVER.

This is SafeGem - a frictionless high-yield generation protocol combined with continuous permanent burn, with a grand vision! We aim to create an exclusive platform that will authenticate precious stones by providing digital certification for gems.

6% of all transactions is automatically redistributed to its holders. This allows making more money than any bank can offer as compound interest return.

**YOUR INVESTMENT WILL MULTIPLY BY JUST HOLDING
SAFE GEM!**

6% TO YOU - 5% BURNED

Besides passive income, what makes SafeGem special is that after presale is completed, 53.25% of SafeGem tokens will be burnt forever to permanently reduce total supply. More than that, 5% of each transaction is also burnt forever.

These key aspects, combined with a competent marketing plan will just keep on giving to the long term holders.

Tokenomics

SUPPLY DISTRIBUTION

SAFEGEM PROTOCOL

Safegem applies two simple functions: Reflection and Continuous Burn

6% of each transaction is redistributed to existing holders

5% of each transaction is burnt forever which permanently reduces SafeGem's total supply

Safety

The trust of our community is crucial for us! This is why we've taken the following actions to ensure safety and security for our investors.

Presale

Fairly distributed presale. SafeGem has entered the crypto space through a presale campaign hosted by DxSale. The specifics of the presale were designed to ensure a dump-proof, healthy price action for future holders after launch.

Liquidity Locked

Liquidity locked on DXLocker for 1 year.

Dev and Marketing Wallet Locked

Dev and Marketing wallet locked for 30 days with gradual unlocking procedure.

MaxTX - Dump Proof Transaction Limitation

We have implemented in our smart contract a function called MaxTX that protect againsts massive dumps from whales, meaning that a transaction can't exceed a certain percentage of the circulating supply.

Ownership Renouncement

After presale and the initial burn, all keys are burnt and ownership will be renounced so SafeGem will become a true community owned and community-driven token. This, together with the aspects mentioned above, will ensure that SafeGem is 100% rug proof.

Roadmap

Having a vision means everything for a project. This is what we planned for the next 9 months, but we take very seriously our community's feedback and this roadmap can be changed accordingly.

Q2 - 2021

Smart Contract creation

Website launch and social media channels

Presale

53.25% of total supply burnt

Blockfolio listing

Coingecko and CoinMarketCap listing

Audit

Marketing plan - phase 1

Q3 - 2021

Small-Mid tier exchange listing

Partnership Announcements

Marketing Plan - phase 2

NFT Marketplace

Website rebranding

Team scaling

Q4 - 2021

Launch NFT Authenticator via Digital Certificates for precious stones

Ecosystem expansion

Large tier exchange listing

Implementation of Community Initiatives
